

hSo increase area served to over 10.5m sq ft

2nd July 2003

Leading UK Broadband connectivity and services provider, hSo has passed a significant milestone and is now serving over 10.5 million ft2 of offices owned by 68 leading landlords including Grosvenor Estate, Shaftesbury plc, Investstream, Isis Property Asset Management, Great Portland Estates, The Church Commissioners and Corporation of London.

hSo is an integrated communications provider bringing managed voice, Internet, video and data solutions to business customers in UK metropolitan markets. Working in partnership with property owners, hSo installs and operates state of the art networks to provide single source, simple and convenient best-of-breed and competitively priced telecoms and data services to tenants; offering scalable bandwidth and secure solutions, together with a commitment to industry-leading customer service.

hSo has recently hosted its first Broadband seminar where 94 City and West End office agents gathered to learn about the latest developments in communications technology. The event was held 350 Regent's Place, NW1 British Land's flagship office scheme, where over 50% of the space has now been let to occupiers including Capital One and Elexon, with only 57,0000 ft2 remaining.

Owned by British Land, Canary Wharf, Legal & General, Morley and Prudential, hSo is providing Broadband services to many of London's leading office developments including Broadgate and Canary Wharf; and now also serving leading Business Parks including Prudential's GreenPark, Reading and Standard Life's Croxley Park at Watford. hSo has also embarked on regional expansion to serve customers in Birmingham, Dublin, Leeds, Sheffield, Manchester and Bournemouth.

hSo Property Director, Jakes Ferguson comments, "Broadband is now a serious factor in choice of location as telecoms consultants are steering occupiers away from schemes where Broadband connectivity and services are not instantly available at reasonable prices. Forward thinking landlords like Standard Life and Prudential have Broadband enabled their Business Parks; and leading agents are achieving differentiation by actively promoting Broadband enabled properties"
